Projects

1. Personal Projects   **#personal**

DEV Clone Website   January - Feburary 2024

- **Source:**
  - **Backend repository: https://github.com/phamgiaphuc/dev-website-clone-backend**
  - **Frontend repository: https://github.com/phamgiaphuc/dev-website-clone-frontend**
- **Description:** Build and design a DEV clone website with the same main features
  - Authentication and Authorization: User email and password, Google authentication (Firebase), Code verification.
  - User features: User's profile; Password reset, User's dashboard, Create blog
  - Blog features: Editor page, Preview page, Blog page.
  - Other features: Home page, Info Page, Not found page.
- **Technology: TypeScript, NodeJS, ExpressJS, MongoDB, Mongoose, Firebase Admin, JWT, Nodemailer, and Postman (Backend); React, Vite, React Hook Form, React Redux, Firebase, Eslint, TailwindCSS, Framer Motion, and EditorJS (Frontend); Render and Netlify (Deployment)**

[Airbnb Clone Website](https://github.com/phamgiaphuc/mern-airbnb-clone)
January - February 2024

- **Source:** https://github.com/phamgiaphuc/mern-airbnb-clone
- **Description:** A simple Airbnb clone website with some main features (user authentication, accommodation dashboard and CRUDs, user's profile).
- **Technology: NodeJS, ExpressJS, MongoDB, JWT and Postman (Backend); Vite, React, TailwindCSS and Axios (Frontend); Netlify and Render (Deployment)**

2. Google Developer Student Clubs - HCMIU   [#dsc.hcmiu](#)

[Telegram Bot API](https://github.com/phamgiaphuc/tele-bot-api) (Fullstack - Personal Project)
August - September 2023

- **Source:** https://github.com/phamgiaphuc/tele-bot-api
- **Description:**
  - Developed the APIs for a Telegram Bot that can be served as an admin bot integrated in a group chat.
  - Built a dashboard to show all relevant data such as users in a group chat.
- **Technology: NodeJS, ExpressJS, TelegrafJS, MongoDB, Postman, and Docker (Backend); React, Vite, and TailwindCSS (Frontend); Netlify and Vercel (Deployment)**

[GDSCIU Quiz](https://github.com/GDSC-HCMIU/gdcsiu-quiz) (Deployment & Tester)
September 2023

- **Source:** https://github.com/GDSC-HCMIU/gdcsiu-quiz
- **Description:** Test and deployed the quiz website to server for Club Info Day at International University.
- **Technology: Netlify**

3. IU Startup Demo Day   [#IUStartupDemoDay](#)

[MrBean Mobile App](https://github.com/phamgiaphuc/MrBeanMobileApp)
April 2024

- **Source:** https://github.com/phamgiaphuc/MrBeanMobileApp
- **Description:** This is a mobile app for collecting coffee grounds - A product for IU Startup Demo Day Contest.
  - Core features: Market page, Camera and QR Page, News Page and Home Page with Google Maps.
  - AI features: Gemini AI - an assistant helps users to answer questions related to coffee.
- **Technology: TypeScript, React Native, Expo and Gemini AI**
